24 HOUR MECHANICAL TIMER

GMT03A-AU

Instruction manual

Instructions

- **Disconnect:** Ensure the timer is disconnected from the mains power socket.
- **Select Mode:** The timer switch has two modes which are selectable by using the red slide switch on the side of the body. When the switch is set to manual mode ("I"), the timer controls are bypassed, and the socket outlet is always on. When the red timer mode switch is set to the clock symbol ("🕒") the timer mode is set, and the socket outlet state will as per the on/off times selected.

- **Set On/ Off times:** Each of the red plastic tabs are adjustable to the inwards or outwards position. Each tab represents 15 minutes. Push each tab outward and in line with each time of day you want the outlet socket to be on. Push each tab inwards and in line with the time of day you want the outlet socket to be off. The red indicator light on the front of the body will be on when the timer is switched on.
- **Set Time:** Rotate the dial face until the arrowhead is in line with the current time.
- **Plug in:** Connect your timer to the supply socket outlet, then connect your appliance plug into the timer socket outlet. Now switch on the wall socket.
