

MILAZO® Magnesium Balance Bike Instruction Manual

Congratulations on purchasing the Warehouse balance bike. The aim of the balance bike is to assist in development of your child's balance, coordination and steering, as well as building strength and motor skills. Your child will be able to learn how to ride with ease.

Please pay attention to the following safety guidelines.

Important Safety information:

1. Recommended for children 2 years +.
2. Check all parts are in good condition and that screws and tyres are tightened correctly.
3. Protective gear should always be worn when riding any bike (helmet, knee and elbows pads must be worn at all times).
4. Always ensure that appropriate footwear is worn whilst riding this bike.
5. Maximum weight is 20kgs.
6. Only one person to ride this bike at any given time.
7. This bike is not intended for stunting or tricks.
8. Do not use on roadways, always ride in a safe environment such as a park or private property.
9. This balance bike is not constructed for uneven paths, stairs, steep hill, or other rocky surfaces, Damage may be done to the bike and to the rider. Only use on flat surfaces.
10. Adult supervision is required at all times.
11. Check the child's feet can rest on the ground while seated on the balance bike. Adjust the seat height before allowing a child to ride this bike.

Maintenance

1. Clean with a soft cloth and warm water and dry thoroughly. Do not use abrasive cleaners or scrubbers.
2. The product must not be stored in places with high temperature, intensive sun light, excessive dust and must be kept dry.
3. Ensure to check all fixings and bolts regularly to ensure they are captive.

WARNING: Item to be assembled by an adult only. Choking hazard, contains small assembly components with functional sharp points and edges.

Parts and components

Installation procedure

1. Loosen the screw at the tube, and move the tube into correct place, then tighten the screw.

2. Install the handlebars: remove the body screws, align the handlebars with the body and put on the front fixing pad then tighten the screws.

If the tyre does not feel firm, please inflate the tyre by pump.
The maximum tyre pressure is 40psi.
Recommended to inflate tyre to 35psi.
Ensure tyres are firm but do not overinflate.
