

How to install your mirror or frame

General Installation

Assembly should be carried out by a qualified person, because wrong assembly may lead to that the furniture will fall and cause injury or damage.

Fastening devices for the wall are not included since different wall materials require different types of fastening devices.

Use fastening devices suitable for the walls in your home. Assess the suitability of the wall to ensure that the fastening devices will withstand the forces generated. For advice on suitable fastening devices, contact your local hardware store.

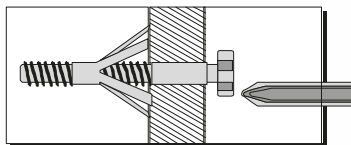

Never use wire, string, or chains to hang a mirror or frame
This puts additional forces on the frame and could cause it to break.

Common Hardware for installation

For advice on suitable fastening devices, contact your local hardware store.

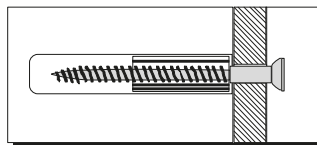

Plaster Board

Cavity Fixing Wall Plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets, coat racks, large frames, or mirrors

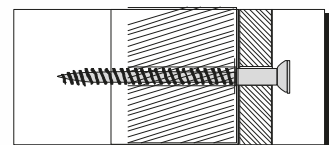

Brick

Standard Wall Plug

These come in various sizes and are made from plastic or sometimes wood fibre.

Solid Timber Wall

Wood Screw

This shall only be use if going into a solid timber surface, such as a support beam or plywood.

Safety

- When drilling into walls always check that there are no hidden wires or pipes etc. Make sure that the screws and wall plugs being used are suitable for supporting your unit.
- General Rule Always use a larger screw and wall plug if you are not sure.
- Always check the mirror periodically to ensure no fittings have become loose.
- It is recommended that at least two people hang a large and heavy mirror.

Cleaning

- Do not use any abrasive substance to clean the glass.
- Wipe clean with a damp cloth. Use only water or glass cleaner.
- Wipe dry with a clean cloth.
